HELMET SIZE GUIDE

SUPPLIED BY FP MOTORSPORTS

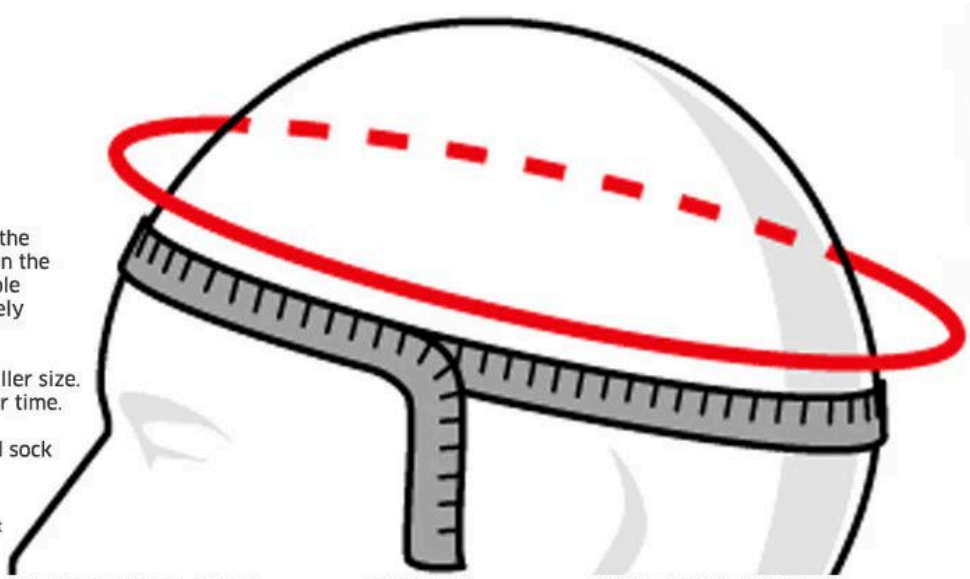

BELL HELMETS

Measure approximately 1" (25mm) above the eyebrows around to the back that results in the largest possible measurement. Take multiple measurements - the largest being your likely helmet size.

If you're in-between sizes, choose the smaller size. Helmet padding will compress slightly over time.

Remember to wear your balaclava or head sock and consider your hair cut/style.

Sizes shown below are specific to Bell helmets and may not relate to any other helmet brand.
